The color of the leathers may vary slightly depending on the supply

SUAVE / VERA PELLE

CAT. 2500

E' una pelle con grana naturale con spessore medio di 1,2 – 1,4 mm. Ha un aspetto semilucido caratterizzato da grana abbastanza evidente ma irregolare che può, quindi, essere più grossa in alcuni punti e di dimensioni più ridotte in altri. Suave si fa apprezzare per il tatto morbido e setoso; la naturalezza delle pelle viene certificata ed esaltata dalla presenza dei segni di vita dell'animale come segni, punture di insetti e cicatrici.

Consigli per la pulizia

Per la pulizia di routine, utilizzare un panno morbido e asciutto o appena umido. Si consiglia vivamente di tenere lontane le forme di calore e di luce intensa.

REAL LEATHER - SUAVE

Natural grain leather with an average thickness of 1.2 - 1.4 mm.

The carefully chosen leather is treated with a grinding process on the surface.

All the treatments help to preserve leather's exceptional natural characteristics, including certain anomalies due to the free range raising of the animals, such as scars, slight grazing, insect bites etc. These anomalies are visible proof of a natural product. The leather of this category is characterized by a glossy grain, obtained by the use of waxes in the finishing process, slightly in relief, for a very soft hand and a silky touch.

Cleaning tips

For everyday cleaning a wet cloth can be used without rubbing. In case of stains, use distilled water and mild soap.

It is recommended to let it dry naturally, and avoid the use of artificial heat sources.
